Personal Characteristics

I have been around horses my whole life. Whether it's training them, working them, doctoring them, and even competing with them, I feel I have a fair share of knowledge about them and the care for them. I learned a lot from my family, especially my grandfather but my more advanced knowledge of horses I learned through 4-H, clinics, schooling and self-education from articles and books. Anything I am not sure to do around horses I will ask and am eager to learn and broaden my knowledge of horses. I am very comfortable around horses and can easily walk up a new horse to work with without being nervous or scared around the animal.
